

Primary Schools

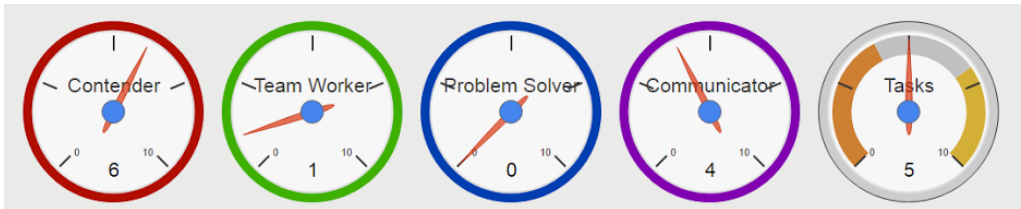

The Achievement Builder framework contains a manageable, focused skill set:

Skills

CONTENDER
TEAM WORKER
PROBLEM SOLVER
COMMUNICATOR

Attributes

PARTICIPATING & RESILIENCE
TEAMWORK & LEADING
CREATIVITY & PROBLEM SOLVING
LISTENING & PRESENTING

Achievement Builder comes complete with a wide range of tasks for students to work from at Explorer level. The tasks are mainly school-based activities developing skills in the classroom. Tasks can be adapted to your school's context or new ones easily created, for example to record organised extra curriculum activities or to recognise interests and achievements out of school.

Why this framework?

Through our role in enterprise education we have worked in partnership with employers and schools across the country to produce a framework that is easy to understand and covers a broad set of skills that are relevant, useful, promote confidence and support achievement in all walks of life.

Celebrating success

As well as developing and recording skills and related attributes, we believe celebrating success is a key part of motivating students and building their self-esteem and confidence. We can provide cost effective certification, badges and/or stickers to promote student recognition of achievement.

How does it work?

Each student has their own account to access tasks and record their achievements. Students select a task, add evidence, including photos and build their portfolio. Reflective comments are logged to provide a record of progress over time.

A tutor can quickly monitor and assess progress with minimal workload and move a student to the next level when ready. Certificates can be awarded when a level is complete.

We have maintained our user centred, less is more approach to software development making Achievement Builder very easy to use with contemporary styling, which appeals to users of all ages.

Watch the video on the website to see how it works in practice.

Support to help you develop and implement your programme.

We provide a free support pack to get you set up and started, including clear information about and definitions of the skills and attributes plus illustrations of what progression looks like.

We can also provide further costed support for those of you looking to introduce or develop your own approach, including developing your own framework if this is a better fit with your ethos or approach.

We can offer advice about what works at a strategic level, how to embed your skills programme and also practical support for staff developing tasks and working with students.

What does it cost?

Achievement Builder costs £895* for a whole school one-year subscription or £1800* for 3 years paid in advance. Cost includes initial set up, starter tasks and support. *(Plus VAT)
